Industrial Visit Report

Future Finders

Date-03-03-2026

Date of Visit: March 2, 2026 (Monday)

Organized By: Faculty of Sciences & Technology(FST),The ICFAI University, Himachal Pradesh

Class: Students of technology.

An industrial visit to Future Finders was organized by our department to provide practical exposure to students about the working environment of the IT industry. The main objective of this visit was to understand real-time industrial operations, interact with professionals, and gain knowledge about emerging and running technologies used in the company.

About the Company

Future Finders is a technology-based company that provides training and development services in modern IT fields such as Full Stack Development, Artificial Intelligence, Cyber Security, and Digital Marketing. The company focuses on skill development, innovation, and preparing students for industry requirements.

Interactions:

During the visit, students had the opportunity to interact with members of departments. Each department explained its roles and responsibilities in detail:

1. MERN Stack Team

The team explained how full-stack web applications are developed using MongoDB, Express.js, React.js, and Node.js. They described how frontend and backend systems are connected and demonstrated how databases store and manage data. Students discussed project development and industry expectations with the team members.

2. AI/ML Department

The AI/ML experts explained the concept of machine learning and how data is used to train intelligent models. They shared examples such as chatbots, prediction systems, and automation tools. Students interacted actively and asked questions about career scope and required programming skills.

3. Cyber Security Department

This department focused on data protection and ethical hacking practices. The team explained different types of cyber threats and security measures used to prevent attacks. A brief discussion was held on certifications and future demand in cyber security.

4. Digital Marketing Department

The digital marketing team introduced concepts like SEO, social media marketing, and online advertising. They explained how companies use digital platforms to increase visibility and customer engagement.

They explained how these technologies are currently being implemented in projects and how they will shape the future of the IT industry.

Practical Demonstration

Students were shown live project demonstrations, including website development processes and application deployment. The team explained project management methods like Agile methodology and how teams collaborate using tools like Git and project management software.

Learning Outcomes

From this visit, students gained:

- Practical knowledge about the working of an IT company
- Understanding of teamwork and professional communication
- Awareness about latest and upcoming technologies
- Guidance about career opportunities in the IT sector

Key Highlight

- **MoU (Memorandum of Understanding) signing process between University and the company for future collaboration, training programs, internships, and skill development initiatives.**

The industrial visit to **Future Finders** was highly informative and beneficial. Along with technical knowledge, the MoU signing marked an important step toward future collaboration between the institution and the company. This partnership will help students gain practical exposure, internships, and industry-relevant skills, supporting their professional growth in the IT field.
